

Evening Beach Exploration

Pre-class Activity

Introduction: Evening Exploration is a great class that will allow you to learn more about our human senses at night and some of the animals that operate best at night.

Directions: Close your eyes and picture a beach. This can be a beach you have visited or a beach you have seen in a picture. When you have an image, complete the following prompts:

1. Can you draw the beach on the back of this page? Add some things you hope to see at the beach during your Driftwood trip.

Now that you have pictured a beach in your mind, we will explore what you feel!

2. What do you feel when you walk on the beach without footwear? If you are not familiar with beaches, what do you think you will feel? Avoid using 'sandy' or 'sticky' in your answer!

3. What sounds do you think you will hear at the beach? Avoid using 'wave' or 'seagull' in your answer!

4. What scents do you think you will smell at the beach? Avoid using 'fishy' or 'salty' in your answer!

5. What do you feel thinking about the beach? How do you think you will feel during your visit? Avoid using 'happy', 'interesting', 'cool', and 'awesome' in your answer!

6. On the following lines, write a brief paragraph on what you think about when you think of the night. Feel free to draw on a memory of being outside at night and the feelings you had at the time. What do you think you will do during the beach Evening Exploration class? Write your thoughts and feelings below.

Evening Beach Exploration

Post-class Activity

Introduction: Now that you have completed the Evening Beach Exploration class at Driftwood it is time to reflect on the activities you were able to do during the night hours.

Directions: Below are the 5 senses you used during your class. In each box, describe how that sense helped you with the activity and how you could use that sense at home and school. Be creative!

Sight

Hear

Taste

Touch

Smell
